Restriction and Election

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 are drawn to a prepolymer composition containing diphenylmethane diisocyanate and polyol, classified in class 528, subclass 60.
- II. Claims 17-18 are drawn to a polyurethane adhesive composition containing a polyurethane prepolymer and an isocyanate, classified in class 528, subclass 64.
- III. Claims 19-20 are drawn to a method for joining two substrates using a polyurethane adhesive composition, classified in class 521, subclasses 125 and 159.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)).

Art Unit: 1625

In the instant case the invention of Group II is directed to the polyurethane adhesive composition, whereas the invention of group III is directed to the method for joining two substrates using the polyurethane adhesive composition. The invention of Group II can be used in a materially different process of using that product, such as a production of fiber disclosed in Klinksiek et al (U.S. 5,302,660).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

A telephone call was made to Michael Leach on 9/20/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
